"SAVING A BIG LAND"

The Alaska oil pipeline is the largest privately financed construction project in the world today. But since the discovery of oil on the North Slope, the public awareness of environmental issues has grown dramatically. Public pressure has resulted in brand new environmental concerns on the part of the oil companies. If they can bring oil from Alaska without damaging the environment, without seriously disrupting the life of the Eskimos, a step forward will have been taken. The lessons learned on the tundra of Alaska could be applied elsewhere, no matter what the climate.

Producer-Director	Robert Dierbeck
Camera	Ivan Stoynov
Sound	John Jaguadak
Editor	Mark Robbins
Sound Mix	Roy Werner
Narrator	Robert E. Jones
For The New York State Education Department	Bernarr Cooper, William Hetzer
